

This week's learning at Brindishe Lee...

We did the tricky word 'a'. When an 'a' has friends, it makes an *a* sound, but when it is on its own, it is the tricky word 'a', like 'a pig in mud'.

Reception

We did greater than and less than crocodiles in Maths. We also wrote a sorry letter to the bear pretending to be the rabbit from our book *I Want My Hat Back*.

Year 1

We wrote timelines in History about events from our own lives. We also finished our book, *Flotsam* which is about rubbish that comes from the sea.

Year 2

We started reading the story *The First Drawing*. We also made diagonal cube patterns in Maths and looked how lava is made in a volcano. Did you know lava is liquid rock?

Year 3
Magnolia

We made effective stone age pictures in Art. We did some monoprinting and also made woolly mammoths using our handprints.

Year 3
Sycamore

We learnt about the life cycle of plants and how a bee helps a plant reproduce: it carries pollen on its body and legs to from one flower's stamen to another flower's stigma.

Year 4

In Maths, we learnt that factors are numbers that a certain number can be divided by without a remainder. We also looked at Floella Benjamin's life in English.

Year 5

We published our utopian and dystopian writing, illustrating them to match the mood. We also did negative numbers and used temperatures of countries to figure it out.

Year 6

Our Social correspondent reports that everyone has really enjoyed coming back to Brindishe Lee and seeing their friends and teachers this past half-term. We're all looking forward to the break and coming back in November!
