

Year 4 half termly home learning project Summer 2026 2nd half

This half term children, we would like you to find out about plants and animals in the rainforest. You could choose one to find out about in detail or you could choose one from each of the four layers of the rainforest. You might want to create a fact file, a poster, a PowerPoint or you could be creative and create a habitat in a shoebox or a model plant or animal. The choice is yours!

You can bring your completed project in any time you want so we can share and display it.

Good luck children!

Mrs Rathbone and Mrs Souissi
